ABOUT ME

I am an experienced **Data Analyst / Power BI Developer** with over **4 years** of professional experience in **Data Analytics & Business Intelligence**. I have hands-on experience on **Power BI, DAX, SQL, Power Query, Data Modeling, ETL, Data Cleaning, Excel, and Python** with strong expertise in **Dashboard Development, Reporting, Data Visualization & KPI development**.

A **detail-oriented** and analytical professional with strong **problem solving skills**, experienced in understanding **Business Requirements, transforming data, developing DAX calculations** and building **interactive dashboards** to deliver clear, actionable business insights.

TECHNICAL SKILLS

	BI & Data Visualization	Power BI, Power BI Service, Power Query, Data Visualization, Dashboard Development, KPI Reporting
	Data Analytics	Data Cleaning, Data Transformation, RLS, Star Schema Data Modeling, Data Validation, Business Intelligence
	Tools & Technologies	Power BI Desktop, Power BI Service, M-Query, SQL, Excel, ETL, Cloud AI, Python
	AI & Productivity Tools	ChatGPT, Microsoft Copilot, Cloud AI, Prompt Engineering

PROFESSIONAL EXPERIENCE

Newgen Software Technology Data Analyst

Dec 2023 – Present

- Developed and maintained **interactive Power BI dashboards**, including **Learning & Development** and **Campus Hiring Dashboards**, to track business KPIs, performance.
- Used **SQL, Power Query and Power BI** to **extract, clean, transform & validate data** from multiple business sources, preparing reliable datasets for dashboard development.
- Created 70+ advanced **DAX measures** for KPIs, **business calculations**, percentages & time based analysis, **reducing manual reporting effort by 30%** across **HR & L&D operations**.
- Designed and maintained Power BI **data models**, including **relationships, Calendar tables** and **lookup tables** to ensure accurate data integration.
- Translated **business requirements into clear, actionable dashboards** using interactive **filters, KPI cards, charts, Slicer** and **drill-through** reports.
- Performed **data validation** and **reconciliation** to ensure accuracy and consistency between **source data** and **Power BI reports** and Created reusable calculations and reporting logic .
- Worked with **stakeholders** to identify reporting requirements, **resolved data issues by 20%** and **deliver business-focused analytical solutions**.

KEY ACHIEVEMENTS

- Recognized for **delivering high-quality** interactive Dashboards supporting **HR** and **L&D** team.
- Awarded the **Brand Signature Award** for creatively naming the product “**PRISM**” & its tagline.
- Won the **Newgen Premier League Cricket** as Captain, showcasing leadership and teamwork.

PROJECTS SUMMARY

Learning & Development Analytics Dashboard

A centralized Power BI dashboard for the **L&D team** to manage and **track employee learning**. It shows **learning hours, courses, LMS usage, active users, course completion, compliance, employee participation and capability development**. Users can filter dashboard by year, month, department, employee type and course category, to compare learning hours, **active users, course usage & completion** for different periods. This helps **L&D team** to find **low participation, learning gaps & compliance issues** and understand where more training is needed.

- Integrated **employee, training, LMS and course data** from multiple sources and created a structured **Power BI data model** for centralized reporting.
- Created reusable **Power Query transformations** and DAX calculations to maintain consistent reporting logic and **reduce dependency** on manual reporting.
- Build **KPI cards, charts, matrices, slicers** and **drill-through** reports to provide clear insights.

Campus Hiring Dashboard

Centralized Power BI dashboard for **HR teams to track campus hiring, offers, headcount, attrition, diversity and employee KPI performance**. It brings recruitment & employee data into one place and allows users to filter by batch, department, gender, tenure, salary band and recruitment type **to compare hiring and attrition trends** and identify areas that need attention.

- Combined **employee, recruitment, offer and attrition data** from multiple sources into a structured Power BI **data model**, and implemented calendar relationships.
- Designed and maintained a **Star Schema** data model with **fact table** and **dimension tables, Calendar and lookup tables** to support accurate filtering and **DAX calculations**.
- Created analysis for **campus vs lateral hiring, batch-wise hiring, gender diversity, KPI ratings, tenure and salary bands**.

Kine.AI | (Kinelabs Private Limited) Software Engineer | Data Applications

Aug 2023 – Nov 2023

An engineering intelligence platform that brings software development data from tools like Jira, GitHub and GitLab into one place to track sprint progress, delivery performance and developer productivity, identify issues, and use data insights to improve the software development process.

Cisco Systems (India) Software Development Engineer

Aug 2021 - Aug 2022

Worked on the Config Separation – POC project as part of the software development team, supporting technical and problem-solving activities under project guidance. Gained hands-on exposure to Java and Python through project and structured technical training.

EDUCATION

Bachelor Of Engineering RGPV University

Bhopal | 2020

CERTIFICATIONS

Master In Power BI Desktop and Service
SQL Data Analysis
Python for Data Analysis Full Bootcamp
